PROFESSIONAL SUMMARY

Senior Software Engineer I at HCLSoftware with a track record of architecting scalable enterprise solutions. Expert in Micro-frontend (MFE) Architecture and BFF patterns, driving a 40% acceleration in feature delivery and 60% improvement in LCP. Pioneer in Agentic Development, leveraging MCP and Agentic IDEs to increase UI development efficiency by 30%.

TECHNICAL SKILLS

- ***Languages & Frameworks:*** *React.js, TypeScript, Next.js 15, Node.js, Java, SQL (Postgres), GraphQL.*
- ***Architecture & Security:*** *Micro-frontends, BFF Pattern, Keycloak, OIDC, OAuth2, RBAC, Registry-Driven UI.*
- ***Tools & DevOps:*** *Docker, Kubernetes, AWS (EC2, S3), Jenkins CI/CD, Redis, Webpack, Redux Toolkit.*
- ***AI & Agentic Tools:*** *Windsurf, Cascade, VS Code Copilot, Gemini Code Assist, MCP (Model Context Protocol).*

EDUCATION

Raj Kumar Goel Institute of Technology, AKTU *| B. Tech in CS (CGPA: 8.58) | July 2023*

WORK EXPERIENCE

HCLTech (HCLSoftware) | Senior Software Engineer 1 | Oct 2025 – Present

- *Architected enterprise-grade security layers using Keycloak, implementing SSO and OIDC workflows for synchronized session management.*
- *Automated the translation of Figma design tokens into modular React components using MCP servers, increasing development efficiency by 30%.*
- *Serving as Acting UI Lead, mentoring a team of 4 engineers in adopting agentic workflows (Cascade/Gemini) to maintain high code quality and 80%+ test coverage.*
- *Promoted to E2 Band based on performance and skill criticality*

HCLTech (HCLSoftware) | Software Engineer 2 | June 2024 – Sept 2025

- *Engineered a modular Micro-frontend (MFE) architecture using React and TypeScript, accelerating feature delivery by 40%.*
- *Improved application performance (LCP) by 60% through UI virtualization and advanced lazy loading strategies.*
- *Implemented a BFF (Backend-for-Frontend) pattern in collaboration with DevOps teams to improve workflow efficiency by 30%.*

HCLTech (HCLSoftware) | Software Engineer | Oct 2023 – May 2024

- *Product Development: Developed the Release Management Visualization module for "Velocity" to streamline CI/CD pipeline visibility.*
- *Refactoring: Resolved state synchronization issues across 10+ apps by refactoring legacy Redux architecture, improving reliability by 40%.*
- *Optimization: Reduced screen load times by 50% through memorization and optimized selectors for data-heavy dashboards.*

PROJECTS

Nexus Dashboard Platform (AI-Ready MFE Orchestration) | Link

- *Engineered a production-grade MFE Orchestration platform with a custom Widget Loader engine for 100% decoupling.*
- *Architected a Registry-Driven UI using PostgreSQL to render LLM-generated metadata and layouts without redeployment.*

Nexus-Core (Distributed Event Streaming) | Link

- *Built an Async Audit Logging Pipeline using Redis as a broker, handling 5k+ logs/sec with sub-10ms latency.*

Secure-Nexus (Enterprise IAM) | Link

- *Developed a production-ready IAM dashboard with OIDC RP-Initiated Logout and strict JWT/RBAC validation.*
